Conveniently manage your detectors

Data storage and analysis has never been so simple. With the same look and feel as Fleet Manager, **Fleet Manager II** allows users to download information directly from BW instruments or the MicroDock II. With improved functionality, users can:

- Automatically create accurate and user-friendly reports
- Easily sort, format and graph data as well as view history
- Archive and share data easily, including databases
- Download and manage calibration and bump check records as well as datalogged information onto any PC

Other enhancements include:

- Improved data transfer and download speed
- Easily schedule routine automatic imports of test results
- Calibration Certificates and bump test receipts are available at the press of a button
- Produce reports in PDF format or Microsoft Excel
- Flexible settings allow users to select the devices applicable to them
- Full user's manual embedded in the Help menu and on the installation CD

The MMC reader, IR DataLink and IR Connectivity Kit download information directly from BW instruments to Fleet Manager II. Download a datalogged file from a GasAlertMicro 5 in less than a minute.

Download information quickly and directly from BW's MicroDock II test and calibration system.

Download datalogged files directly from:

- GasAlert Extreme (use the IR DataLink)
- GasAlertMicroClip (use the USB Connectivity Kit)
- GasAlertClip Extreme 2 and 3
- GasAlertMicro (use the MMC Reader)
- GasAlertMicro 5 / PID / IR (use the MMC Reader)
- MicroDock II
