Flammable, toxic and Oxygen gas detector for industrial applications
The Sensepoint XCD range provides comprehensive monitoring of flammable, toxic and Oxygen gas hazards in potentially explosive atmospheres, both indoors and outdoors. Users can modify detector operation using the LCD and magnet switches without ever needing to open the unit. This enables one-man, non-intrusive operation and reduces routine maintenance time and costs.

A tri-colour backlit LCD clearly indicates the unit’s status at a glance, even from a distance. A steady green backlight indicates normal operation, flashing yellow indicates fault and flashing red indicates an alarm.

All detectors are supplied pre-configured and include 2 programmable alarm relays, 1 programmable fault relay as well as an industry standard 4-20mA output (sink or source selectable) and MODBUS.

The scale, range, relay operation, alarm set point and electronic tag number of the detector can be adjusted using the transmitter’s LCD and non-intrusive magnetic switches. Outputs are automatically inhibited during adjustment, thereby reducing the risk of false alarm at the control panel during maintenance.

Sensepoint XCD has an integral mounting plate for surface mounting or can be mounted to a horizontal or vertical pipe using the optional pipe mounting bracket. Electrical installation can be made using either conduit or cable with suitable mechanical protection. Two M20 or ¾"NPT entries are provided (depending on certification). A weatherproof cap is also included for use in the harshest outdoor conditions. Other optional accessories include a sunshade/deluge protection, duct mounting kit and collecting cone.

Sensepoint XCD ensures easy installation and the fastest routine operation by removing the need for hot work permits in hazardous areas. Using easy to replace plug-in sensors, downtime is also reduced and on-going costs are minimised through the use of poison resistant flammable sensors and patented Surecell™ toxic sensors.
There are three different types of the XCD transmitter for use with three different families of sensors.

The mV type transmitter is for use with the mV family of XCD sensors including catalytic sensors to detect flammable gases in the range 0-100%LEL and infrared (IR) sensors for detection of Hydrocarbon gases in the range 0-100%LEL. Two IR Hydrocarbon sensors are available; one linearised to Methane and one linearised to Propane. The Propane version has linear cross sensitivities factors for Ethylene, Butane and Pentane. There is also an IR CO2 sensor available in the range 0-2%Vol.

The EC type transmitter is for use with the EC family of XCD sensors including Carbon Monoxide (CO), Hydrogen Sulphide, (H2S), Nitrogen Dioxide (NO2) and Hydrogen (H2).

The Oxygen transmitter is for use with the Oxygen (O2) XCD sensors.

A transmitter can auto-recognise any sensor from within its sensor family. The sensor simply plugs into the bottom of the transmitter and the transmitter automatically configures itself accordingly.

Sensepoint XCD Overview

Ready, Steady, Go!

Sensepoint XCD uses three instantly recognisable ‘traffic light’ colours to indicate its status. The large tri-colour backlit LCD is steady green to indicate normal operation, flashes yellow to indicate a fault/warning and flashes red to indicate an alarm. This allows anyone in the area to clearly see at a glance the status of any detector. This can be particularly useful to identify detector status if the detector is located in a difficult to access area or if a number of detectors are located in the same area.
The Sensepoint XCD transmitter has an integral mounting plate consisting of four mounting holes on the transmitter body. The transmitter may be fixed directly to a surface mounting, or to a horizontal or vertical pipe/structure, 40.0-80.0mm (1.6 to 3.1") in diameter/cross section. The pipe mounting bracket accessory (optional) may be used for this purpose.

User cable entries shown (2 x M20) are for ATEX/IECEx version enclosures. UL/c-UL versions have 2 x ¾"NPT conduit entries. A suitable blanking plug is supplied which must be used to seal any unused entry. The blanking plug must be suitably sealed to maintain the IP rating of the detector.

Various accessories are available for different applications:
**Installation**

**Electrical**

Senspoint XCD is designed for use in potentially explosive atmospheres. As such, installation should follow national guidelines using suitable mechanically protected cable and glands or conduit. Use 0.5mm² (20AWG) to 2.5mm² (~13AWG) cross sectional area cable as needed to ensure minimum operating voltage at the detector, depending on installed cable length. Cable diameter should be selected to maintain the minimum required voltage for the longest installed cable length under maximum power.

Typical Cable Lengths

</table>

Note: Table given for guidance only. Users should calculate maximum distances using actual data for cable being used. Typical calculation assumes minimum guaranteed controller supply of 24VDC, minimum detector voltage of 16VDC and maximum power supply under full alarm. $R_\text{L (max)}$ is 250ohms.

**Wiring Schematics**

The Senspoint XCD transmitter may be wired in either Current Sink or Current Source configuration. These two options are offered to allow greater flexibility in the type of control system that it can be used with. Sink/Source is selectable via the switch located on the back side of the display module; accessible by removing the display module during installation/commissioning.

Note: Terminate cable screen at the detector or the controller, not both.
## Technical Summary

### Sensepoint XCD Detector

#### Use
3 wire, 4-20mA and RS485 MODBUS output fixed point detector with in-built alarm and fault relays for the protection of personnel and plant from flammable, toxic and Oxygen hazards. Incorporating a transmitter with local display and fully configurable via non-intrusive magnetic switch interface. Wide range of sensors available.

#### Electrical

**Input Voltage Range**: 16 to 32VDC (24VDC nominal) for ATEX/IEEx/AP Versions
12 to 32VDC (24VDC nominal) for UL/CSA version

**Max Power Consumption**: Maximum power consumption is dependent on the type of gas sensor being used. Electrochemical cells = 3.7W, IR = 3.7W and catalytic = 4.9W. Maximum inrush current = 800mA at 24VDC

**Current Output**:
- 0 to 1mA (17.4mA)
- 2.0mA to 20.0mA (300mA)
- 50% to 20.0mA (20%)
- 20mA (100%)

**Communications**:
- RS485, MODBUS RTU (Optional)
- 3 wire, 4-20mA and RS485 MODBUS output fixed point detector with in-built alarm and fault relays for the protection of personnel and plant from flammable, toxic and Oxygen hazards. Incorporating a transmitter with local display and fully configurable via non-intrusive magnetic switch interface. Wide range of sensors available.

- KTL: Ex d IIC T6 (-40°C to +65°C)

**China**
- GB Ex d T4 GB3836.1-2000, PA, CCCF
- KTL: Ex d IIC T6 (-40°C to +65°C)

**North America**
- UL/c-UL: Class I, Division 1, Groups B, C and D, Class I, Division 2, Groups B, C & D, Class II, Division 1, Groups E, F & G, Class II, Division 2, Groups F & G, -40°C to +65°C

**EMC**
- EN50027/2006
- EN50100-6-4:2007

### Performance
- ATEX, EN60079-29-1:2007 (flammable), EN45544 (Toxic), EN50104 (Oxygen), EN50271 (flammable & catalytic)
- China: PA Pattern Measurement (for transmitter and toxic gas sensors)
- “CCCP” Shenying for Flammable (fire dept approval)

### NOTES

- Extended operating temperature range of -40°C to +65°C (-40°F to +149°F) for all sensors except for IR and H2 EC sensors, with an accuracy of +/- 30% of applied gas from -20°C to -40°C (-4°F to -40°F) and 55°C to 65°C (+131°F to +149°F).
- Long term operation at this range may cause decline in sensor performance. Contact Honeywell Analytics for any additional data or details.
**Technical Summary cont. and Ordering Information**

### Environmental
- **IP Rating**: IP66 in accordance with EN60529:1992
- **Certified Temperature Range**: -40°C to +75°C (-40°F to +167°F)
  - Note: The detector display may become illegible at temperatures below -20°C, but the detector continues its gas monitoring function. The display is not damaged and recovers when the temperature rises back above -20°C.
- **Operating Humidity**: Continuous 20-90%RH (non-condensing), Intermittent 10-99%RH (non-condensing)
- **Operating Pressure**: 90-110kPa (EC Toxic Sensors), 80-12kPa (EC Oxygen, Catalytic Bead and Infrared Sensors)

### Ordering Information
- **Standard Supply**: Sensepoint XCD is supplied complete with integral wall mounting plate, 2 x M20 cable entry (ATEX/IECEx) or 2 x ¾"NPT conduit entries (UL/cUL), 1 x M20 or 1 x ¾"NPT plug, Allen key for locking screws, weatherproof cap, operating magnet, sensor cartridge with retainer, quick start guide and instruction manual CD. Default settings, ranges and calibrations are 100% tested at the factory. Each unit is supplied with a calibration and test certificate.
- **Shipping Details**: Shipping carton dimensions: L312mm (12.3") x W223mm (8.8") x D110mm (4.3") Approximate weight: Aluminium 2.5kg (5.5lbs), Stainless Steel 5.5kg (12.1lbs)

### Shipping Details
- Shipping carton dimensions: L312mm (12.3") x W223mm (8.8") x D110mm (4.3") Approximate weight: Aluminium 2.5kg (5.5lbs), Stainless Steel 5.5kg (12.1lbs)
- Each unit is supplied with a calibration and test certificate.
- Sensepoint XCD is supplied complete with integral wall mounting plate, 2 x M20 cable entry (ATEX/IECEx) or 2 x ¾"NPT conduit entries (UL/cUL), 1 x M20 or 1 x ¾"NPT plug, Allen key for locking screws, weatherproof cap, operating magnet, sensor cartridge with retainer, quick start guide and instruction manual CD. Default settings, ranges and calibrations are 100% tested at the factory. Each unit is supplied with a calibration and test certificate.

### Optional Accessories
- **Spare XCD Sensors (316 Stainless Steel)**
  - **S3KCAL**: Calibration cup
  - **SPXCDXSFSS**: Flammable CAT 0-100%LEL (20 to 100%LEL, 10%LEL)**
  - **SPXCDXSRXSS**: Methane IR 0-100%LEL (20 to 100%LEL, 10%LEL)**
  - **SPXCDXSPXSS**: Propane IR 0-100%LEL (20 to 100%LEL, 10%LEL)**
  - **SPXCDXSXXSS**: Oxygen 25.0%/Vol. only
  - **SPXCDXSXXSS**: Hydrogen 0-100ppm only
  - **SPXCDXSXXSS**: Hydrogen Dioxide 0-50.0ppm (10.0 to 100.0ppm, 5.0ppm)**
  - **SPXCDXSXXSS**: Nitrogen Dioxide 0-50.0ppm (10.0-50.0ppm, 5.0ppm)**
  - **SPXCDXSXXSS**: Carbon Dioxide IR 0-2.00%Vol. only

*For UL-to-UL versions simply change the letters in the part number for certification and entry e.g. the first part number in the table would become SPXCDALMFXM.**
Our Product Range

Fixed Gas Monitoring
Honeywell Analytics offers a wide range of fixed gas detection solutions for a diverse array of industries and applications including: Commercial properties, industrial applications, semiconductor manufacturers, energy plants and petrochemical sites.

» Detection of flammable, Oxygen and toxic gases (including exotics)
» Innovative use of four core sensing technologies – paper tape, electrochemical cell, catalytic bead and infrared
» Capability to detect down to Parts Per Billion (ppb) or Percent by Volume (%v/v)
» Cost effective regulatory compliance solutions

Portable Gas Monitoring
When it comes to personal protection from gas hazards, Honeywell Analytics has a wide range of reliable solutions ideally suited for use in confined or enclosed spaces. These include:

» Detection of flammable, Oxygen and toxic gases
» Single gas personal monitors – worn by the individual
» Multi-gas portable gas monitors – used for confined space entry and regulatory compliance
» Multi-gas transportable monitors – used for temporary protection of area during site construction and maintenance activities

Technical Services
At Honeywell Analytics, we believe in the value of great service and customer care. Our key commitment is providing complete and total customer satisfaction. Here are just a few of the services we can offer:

» Full technical support
» Expert team on hand to answer questions and queries
» Fully equipped workshops to ensure quick turnaround on repairs
» Comprehensive service engineer network
» Training on product use and maintenance
» Mobile calibration service
» Customised programmes of preventative/corrective maintenance
» Extended warranties on products
